

# 2602.5 GoPro Mount Kit for DSLR Housing

## Instruction Manual

### Included in Kit

This mount kit includes a 1-inch ball at DSLR top mount, lightweight accessory clamp and GoPort tripod mount to attach your GoPro to an Ikelite DSLR top mount. GoPro camera not included and not available through Ikelite.

Refer to Diagrams A and B on the opposite side of this page for installation procedure.

**Note:** Standard sized 1-inch diameter ball components are also interchangeable with the rest of the Ikelite 1-inch ball arm system components, as well as arms from Ultralight, Aquatica, Nauticam, and others.

## Installation Procedure

1. Check tightness of GoPro Mount on Ball Mount. Attach and tighten Mount Kit securely to DSLR Housing as shown using a flathead screwdriver (not included), **Diagram A**.
2. Once mounted to the DSLR housing mount, loosen the Wingnut slightly and rotate the GoPro Mount so it is vertical with the DSLR Housing, **Diagram B**. Do not accidentally loosen GoPro Mount on Ball Mount during positioning of the Mount Kit.

**Diagram A**

**Diagram B**

**Mount Kit properly attached to Ikelite DSLR Housing.**
