Important Notices

- » **It is recommended to vacuum test and water pressure test or take the housing to depth without a camera installed after installing or replacing the bulkhead.**
- » **Do not submerge without a compatible plug or waterproof bulkhead cap attached.**
- » **Always attach a waterproof bulkhead cap when not in use.**

Installation and Use

Installing the B16 Bulkhead

1. Carefully remove the existing bulkhead or accessory port plug.
2. Check that the sealing surface and o-ring on the bulkhead are clean. No lubricant is necessary.
3. Thread the bulkhead into the housing's M16 accessory port being careful not to cross-thread.
4. Use an 11/16" wrench to carefully tighten down the bulkhead just until it touches the case. Do not over-tighten.
5. Vacuum test the housing using the manufacturer's vacuum system.
6. Take the housing to depth without a camera installed to test for leaks.

Installing the Hotshoe

1. Align hotshoe and bulkhead connector ends and push together until tab clicks into place.

Maintenance and Storage

Post-Dive

1. Submerge the fully assembled system in clean, fresh water after each use.
2. Remove the system from the rinse tank and flush with running fresh water.
3. Dry the system with a clean, lint-free cloth.
4. Separate the plug or cap from the bulkhead and lubricate the threads and o-ring(s) every 1-2 days during continuous use and prior to storage.
5. Check that the bulkhead is tightened firmly to the housing and hasn't loosened as a result of vibration or detaching sync cord.
