External Accessory Lenses

An external wide angle conversion lens increases angle of coverage so you can get much closer to your subject while still fitting everything in the frame. By reducing the amount of water between the subject and your camera lens, the resulting image will be more crisp and colorful.

- Attach 46mm threaded #6420.46 Ikelite W-20 and other lenses directly to the front of the port.

- Attach 67mm threaded #6420 Ikelite W-20, Inon Type II and Epoque lenses using the #9306.81 port adapter. This adapter may also be used to attach 67mm threaded macro lenses.

- Attach bayonet style Inon macro or UWL-100 28AD, UWL-105AD and UFL-165AD wide angle or macro lenses using the #9306.79 port adapter.
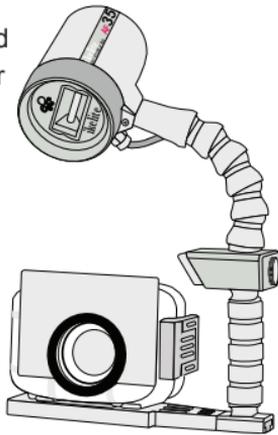

Moderate vignetting (shading in the corners) will be present in the widest setting when using an external accessory lens. This effect can be eliminated by zooming in slightly.
