

Ikelite Digital Housing

supplemental instructions

for

#6240.87 Canon SD870 IS ULTRAcompact Digital Housing

Camera Setup (Canon SD870IS)

1. Use Manual mode. The camera icon plus "M" indicates Manual mode. Note: Pre-flash is present in this mode.
2. Set ISO to 80

NOTE: In "macro" mode, the aperture stops down to f8.0. If over-exposure occurs, enable Macro Mode setting. If over-exposure continues, back away from the subject and then zoom in as necessary. Camera will focus far away even if Macro Mode is on.

Ikelite W-20 Wide-Angle Conversion Lens #6420.46

Your new Ikelite housing features a 46mm threaded port for attachment of external 46mm accessory wet lenses such as the Ikelite 46mm W-20 lens #6420.46. External wide angle conversion lenses increase angle of coverage, so you can get much closer to your subject while still fitting everything in the frame.

#9306.81 67mm Threaded Adaptor

Allows attaching Ikelite W-20 #6420, Epoque, Type II Inon screw-on lenses, and macro lenses or diopters with 67mm threads. Includes larger size removable flash deflector.

#9306.79 Bayonet Mount Adaptor

Allows attaching of the Inon UWL-105AD, UFL-165AD, UWL-100AD, and macro bayonet style lenses. Includes larger size removable flash deflector.

NOTE: Vignetting can occur at widest angle camera lens setting with some wide-angle conversion lenses. Zoom in to eliminate, or crop the image in post-processing. Also, slight edge softness around the edges in some situations is normal.
