for

#6281.63 Nikon S630 ULTRAcompact Digital Housing

Camera Setup (Nikon S630)
1. Set to Shooting Mode (camera icon).
2. Set ISO to 64
3. Set flash to forced "ON" (lightning bolt).
4. Set metering to "Center-Weighted".
5. Set Autofocus mode to "Single AF".
6. Set AF area mode to "center".

NOTE: If over-exposure occurs, back away from the subject and then zoom in as necessary. This will also cause an increase in shutter speed and a smaller aperture setting.

Ikelite W-20 Wide-Angle Conversion Lens #6420

An external wide angle conversion lens increases angle of coverage, so you can get much closer to your subject while still fitting everything in the frame. Add an Ikelite W-20 or other 67mm wide-angle conversion lens to improve your angle of coverage in any shooting situation.

Slight vignetting may occur at widest angle camera lens setting. Zoom in slightly to eliminate, or crop the image in post-processing.

NOTE: Bayonet mount lenses cannot be used with this housing.
