

Ikelite Macro Adapter #9306.82

i n s t r u c t i o n m a n u a l

Optional adapter #9306.82 slides over the front of the lens port and allows for the attachment of 67mm threaded macro lenses from Inon and Epoque. The adapter may be removed and replaced underwater and requires no modification to the housing's standard 3.9" lens port.

Usage:

The Macro Adapter secures over the front of the housing lens port. You will see an o-ring around the inside diameter of the adapter. Apply a thin coating of the supplied lube to get the o-ring "slick" all the way around. This will help when installing and removing the adapter from the housing port.

Water will fill the area between the front of the housing port and the back of your macro lens when installed in the adapter. When first entering the water, check for and remove any air bubbles that cling to either the macro lens or the housing port. It is extremely important that no air bubbles are trapped. The camera may focus on any trapped bubbles resulting in an out of focus image. When in use, we recommend attaching the included lanyard to the housing's tray and handle.

NOTE: The adapter blocks a significant area of the front lens port element and should only be used with a macro lens installed.

- Macro lenses not available for purchase through Ikelite.
- Not for use with 67mm threaded wide angle lenses.

Ikelite Limited Warranty

All Ikelite products are warranted against any manufacturing defects for a period of one (1) year from the original date of purchase. Defective products should be returned prepaid to Ikelite.
